

# IT STARTS WITH ME

## Positive training

## for parents and caregivers

It Starts with Me helps people build more self-confidence and understand each other better. This makes it possible to break patterns that are often passed down from generation to generation.

During the sessions, participants work on what matters most to them, for themselves, their family, or their surroundings.

Everyone is welcome: people from all backgrounds and cultures feel at home at t Starts with Me. The parent training is given in several languages, such as Dutch, Arabic, Turkish, English, and Portuguese. The sessions can be led by both professionals and parents with their own experience.

## Our basic principles:

- We can all be a positive example for the children around us.
- You choose what you want to change.
- We focus on what is possible, stay positive, and look ahead.
- Everyone is responsible for their own choices and behavior.
- Taking care of yourself and recharging sometimes is important so you can be there for others.
- And: if something works out, you can be proud of it!

*"I now have more self-confidence and take better care of myself. Because of that, I have more time for my family."*

*"The training was educational, but also really fun to take part in."*

**Together, we build a positive place for children to grow up in!**
